EXECUTIVE SUMMARY

Senior Engineering Manager with **19+ years of experience** leading digital transformation, AI-enabled SDLC improvements and platform modernization. Successfully delivered large-scale, mission-critical products for global enterprises. Strong track record of building and scaling high-performing teams, retaining top talent, accelerating promotions, and driving revenue through customer-focused product strategies.

CORE COMPETENCIES & TECHNICAL LEADERSHIP

Leadership | People Management | Performance Appraisal | Java | JUnit | Full Stack | System Design

GitHub | Architecture | Microservices | Spring Cloud | AWS | Azure | GCP | Spring Boot

Angular | React.js | JavaScript | CI/CD | Docker | Jenkins | Kubernetes (K8s) | Sql | Node.js

Kafka | RabbitMQ | Golang | Python | Grafana | Prometheus | Splunk | New Relic | MongoDB

MySQL | Oracle | Oracle Apps | PLSQL | Mockito | Scrum/Agile | Generative AI | Agentic AI

KEY BUSINESS IMPACT

- **Drove Revenue Growth:** Shaped CRM roadmap at ServiceNow, delivering Install Base Management and Sales Order Management adopted by global enterprises (BT, SoftBank, AT&T), enabling **new revenue streams**, improved **customer retention** and **higher customer satisfaction**.
- **Improved Engineering ROI:** Drove AI adoption across SDLC, generating **$50K cost savings** and delivering a customer dashboard without expanding the team.
- **Modernized Enterprise Platform:** Led PUMA transformation at JPMorgan Chase **from monolith to microservices**, improving scalability, **reducing SLA breaches and penalty fines**, accelerating new customer onboarding, and contributing to **revenue growth** while maintaining performance for existing customers.
- **Operational Excellence at Scale:** Architected resilient distributed systems **handling millions of transactions** with high availability and business continuity.
- **Improved Productivity by 30%:** Introduced AI-driven development, automation, and agile best practices to accelerate releases and improve quality (**PR Agent, QE Agent, Planner Agent**)
- **Built High-Performing Teams:** Led engineering organization with structured OKRs and career frameworks, achieving **80% internal promotions** and **100% retention** while delivering strategic initiatives.
- **Embedded Agile Culture:** Championed Agile adoption and continuous improvement, enhancing delivery predictability and engineering standards.

CERTIFICATIONS

- Leadership with AI – ISB Online
- Oracle Certified Professional, **Java** SE 17
- **Spring** Certified Professional – **VMWare**
- Certified **Kubernetes** Application Developer
- **AWS** Certified Solutions Architect – Professional
- Microsoft Certified: **Azure** Fundamentals
- **ServiceNow** Certified System Administrator
- **Google Cloud** Professional Cloud Architect

PROFESSIONAL EXPERIENCE

CBRE | Senior Engineering Manager | *Jun 2025 – Present*

- **Strategic Delivery: Own end-to-end delivery, stability, and modernization** of 6 business-critical applications (Evergreen, Site Evaluation, iTax, Single Client View, Loan Services, UK Data Platform
- **Organizational Leadership:** Lead a large-scale engineering organization; established an inclusive culture focused on ownership, resulting in significant talent growth and robust succession planning.
- **AI Transformation:** Pioneered AI adoption across the SDLC, enhancing developer productivity and code quality through AI-assisted development and automated defect prediction.
- **Capability Building:** Drive the Full Stack Technology Focus Group (TFG), defining strategies to expand engineering footprints across global teams.

SERVICENOW | Manager | *Jan 2022 – Jun 2025*

- **Revenue & Growth:** Delivered core products (Install Base & Sales Order Management) foundational to the platform, driving adoption by major global telecommunications and enterprise clients like BT and SoftBank.
- **Team Excellence:** Fostered a high-performing team culture characterized by high retention and internal promotion rates through structured career development.
- **Operational Efficiency:** Integrated AI-assisted tools to significantly boost engineering output and implemented Agentic AI to enhance platform user experiences.
- **Customer Impact:** Led Proactive Case Management initiatives, utilizing AI for early issue detection, reducing resolution times and improving enterprise client satisfaction.

GAP IT SERVICES | Staff Software Engineer | *Jan 2021 – Jan 2022*

- **Logistics Optimization:** Architected the Prepack Application, automating workflows between textile mills and retail outlets, resulting in substantial reductions in logistics expenses.
- **Technical Excellence:** Spearheaded architectural enhancements for Booking Visibility applications, improving system performance and global operational efficiency.

JPMORGAN CHASE BANK | Associate Vice President | *Apr 2017 – Jan 2021*

- **Platform Modernization:** Led the transformation of the PUMA platform from a legacy monolith to a microservices architecture, enabling the bank to scale customer onboarding while maintaining strict SLAs.
- **Resilience & Scale:** Designed proactive monitoring frameworks that minimized system downtime and operational incidents for high-stakes financial applications.

MPHASIS | Project Lead | *Aug 2016 – Apr 2017 (Client – JP Morgan Chase Bank for same project as above)*

ORACLE | Principal Application Engineer | *Dec 2006 – Aug 2017*

- **Global Solutions:** Designed and implemented secure financial frameworks for the APAC region and pioneered a scalable SaaS-based sourcing platform.
- **Product Innovation:** Led the development of automated supplier onboarding platforms, sourcing, shipment trackings reducing manual intervention and ensuring global policy compliance.

EDUCATION

- B.Tech – Computer Science, Jawaharlal Nehru Technological University (2006)
